OUR GOAL IS TO DEVELOP AND IMPROVE THE STATUS OF OUR PROFESSION IN RK

Often we lack knowledge, skills and cohesion, and while we sometimes allow ourselves to complain about the disrespect of doctors, about our role as a powerless executor of the doctor's will. Taking into account the changes that are currently taking place in healthcare (new high-tech equipment, expanding the powers of nursing staff, switching to accreditation...), we must catch up and gain new knowledge and skills in our specialties!

Today the nurse is becoming more independent and responsible and we must strive to meet the requirements of the time and the high expectations of patients.
